Made in Portugal

Images and product samples are representative of a product's potential characteristics. There is no guarantee that the sample product or images will 100% match the product received. Natural stone is a product of nature and subject to variations in color, shade, grain, sizing, veining, movement, pitting, surface texture and finish. No two stone tiles/slabs are exactly the same. Blend stone tiles from different boxes to achieve even color distribution. Installer must conduct a dry mock layout under proper lighting conditions prior to installation. It is the consumer's responsibility to inspect the product prior to installation to ensure satisfaction with all characteristics. Once installed, the product is deemed accepted. Consumer is responsible for ensuring proper installation, application, and use. Aerosol catalyst adhesives should not be used for stone installations as they may cause discoloration. Due to porosity, all natural stone products must be sealed prior to installation. Regular care and maintenance is required for natural stone products. Do not use vinegar or any cleaners containing acids or strong alkalis on natural stone. Check Manufacturer's specifications as some Mosaic tiles may not be appropriate for wet applications. Reference the most current TCNA Handbook, ANSI, Manufacturer's specifications, and Bedrosians Care & Maintenance guide for installation, outdoor use, care and maintenance information. Natural stone products installed in uncovered outdoor installations may experience modifications to the color and finish due to UV and water exposure. Natural stone products are not warranted. We reserve the right to make changes to product specifications at any time without notice. Please visit www.bedrosians.com for current product information.
