Shade Variation

Plane must be handled and installed by a Stonepeak certified installer who has successfully completed the F.A.C.T. training course. Use of an uncertified installer voids warranty.

The maximum allowable installation offset is 33%. Minimum grout joint must be 3/16 inch. Please refer to the most current TCNA Handbook. Use of a leveling system during installation is recommended.

For installation of all polished porcelain, polished glazed porcelain, and all honed porcelain tiles, use a grout release or sealer prior to grouting as well as a grout color that matches the predominant color of the tile. Do not use acidic cleaners on polished porcelain, polished glazed porcelain, or honed porcelain tiles. Check Manufacturer's specifications as tiles with a polished finish may not be appropriate for all commercial applications.

Images and product samples are representative of a product's potential characteristics. There is no guarantee that the sample product or images will 100% match the product received. Field, mosaic, and trim tile may not be an exact match. Tiles are subject to variations in color, shade, sizing, surface texture and finish. Installer must conduct a dry mock layout under proper lighting conditions prior to installation. It is the consumer's responsibility to inspect the product prior to installation to ensure satisfaction. Once installed, the product is deemed accepted. Check Manufacturer's specifications as some Mosaic tiles may not be appropriate for wet applications. Reference the most current TCNA Handbook, ANSI, Manufacturer's specifications, and Bedrosians Care & Maintenance guide for installation, outdoor use, care and maintenance information. Improper installation, application, use, care and maintenance voids warranty. We reserve the right to make changes to product specifications at any time without notice. Please visit [www.bedrosians.com](http://www.bedrosians.com) for current product information.
